HISTORY/FACTS/ISSUES:

The composting program at Sumter County Solid Waste ended in December 2005, as a result, the Solid Waste Department has been transferring out the collected leachate water which is water that has come into contact with solid waste or drained into the leachate collection system. Sumter County would like Kimley-Horn & Associates to conduct a study to determine if there is a better alternative for disposal of the leachate, such as an on site pretreatment plant that would bring the contaminants in the leachate water down to a level that would make it acceptable to the City of Bushnell Wastewater Treatment Plant. A cost analysis for each alternative will also be made. The agreement, which contains the scope of services, is attached.
